

Hegemonic Growth

DECISION BRIEF

Make the right market feel the company already has momentum.

Hegemonic Growth turns founder conviction, product proof, demos, podcasts, and launch claims into repeated visibility across the feeds and rooms that shape startup demand.

HOW IT WORKS

One story. Many surfaces. Measured routing.

01 Extract

Find the strongest founder ideas, proof moments, demos, and market claims.

02 Package

Turn them into clips, X posts, reply assets, launch claims, and follow-up angles.

03 Distribute

Push through founder, company, niche, clipper, and commentary-style accounts.

04 Route

Track attention, warm replies, buyer signals, investor interest, and the next best action.

COMMAND CENTER

A visible room tracks assets, account health, view pacing, routes, and next steps.

The point is not to create loose content. The point is to make distribution legible, measured, and easy to scale.

Choose the room that matches the economic moment.

\$30K

Clipping Trial

Best when strong source content already exists and the first goal is a 10M-view proof window.

\$100K

Viral Startup Sprint

Best for major launches, raises, and Series A-style category pushes that need market heat now.

\$100K-\$200K/mo

Omnipresence Room

Best when founder media becomes a standing GTM channel across X, LinkedIn, shorts, and warm routing.

Bring the launch timing, source assets, target market, and the outcome that would make distribution worth it.
