THE DISTRIBUTION MACHINE

# 800+ active clippers. One campaign room. Your company everywhere.

Our clipper ops layer runs a managed phone and device lab with over 800 active clippers pushing content aggressively across account networks. Phone farm QA, session health, platform separation, and campaign safety are baked into every room.

We map competitor audiences, investor rooms, fund partner accounts, and buyer clusters — then flood those surfaces from every angle until the company feels like part of the future.

If one investor intro, customer, or hire is worth six figures — a campaign at \$3–\$10 CPM is rational. [calendly.com/hegemonic/30min](https://calendly.com/hegemonic/30min)
